Constant Contact Database Size

During the initial migration, Constant Contact contained approximately:

```
Subscribed:   11,705
Unsubscribed:  2,368
```

This represented approximately:

```
14,073
```

contacts visible through the Constant Contact interface.

The API returned approximately:

```
14,076
```

records during reconciliation.

The slight difference is expected because Constant Contact may also contain contacts in states such as:

- pending confirmation,
- temporary hold,
- not set,
- or another non-standard subscription status.

These records are preserved for review rather than assumed to be subscribed.
