Known Issues and Open Items

Issues and gaps found in a review of the code on **28 September 2026**. Update the status column as items are resolved, and add new ones as they're found.

Issues

#	Severity	Issue	Impact	Suggested fix	Status
1	**High**	Volunteer, corporate, and newsletter forms show "Thank you" even when nothing is sent: a placeholder or empty webhook URL simulates success, and `no-cors` hides HighLevel errors.	Leads silently lost	Confirm real webhook URLs are set in Cloudflare Production; submit test entries; ideally move these forms behind a Pages Function that reports failure	Open: verify production values
2	**High**	The footer links to `/privacy`, but no Privacy Policy page exists.	404 on every page's footer link; a privacy policy is expected where forms collect personal data	Add `src/app/privacy/page.tsx` with approved policy text, and add it to the sitemap	Open
3	Medium	"Upcoming" events are computed at build time, and there's no scheduled rebuild.	Past events stay on Home and Events until someone publishes	Add a Cloudflare deploy hook called daily (see *Build and Deployment*)	Open

#	Severity	Issue	Impact	Suggested fix	Status
4	Medium	No spam protection or rate limiting on `/api/event-inquiry`; requests without an `Origin` header bypass the origin check.	Spam contacts and opportunities in HighLevel	Add Cloudflare Turnstile and/or a WAF rate limit	Open
5	Medium	HighLevel donation setup incomplete: matching, designations and campaigns, receipts, refunds, and end-to-end tests.	Gifts may be misclassified or unreceipted	Complete the checklist in *Donations and Memberships*	Open (HighLevel)
6	Medium	`public/_redirects` isn't populated from the old WordPress site.	Lost search rankings and broken inbound links at launch	Crawl the old site and map every URL	Open: pre-launch
7	Medium	Event times are stored with the **editor's browser time zone** offset.	Wrong times if entered from a non-Eastern computer	Train editors (documented); optionally normalise to Eastern in `getPublicEvents()`	Mitigated by docs
8	Low	Decap CMS was loaded from unpkg with a floating `^3.8.0` range.	An upstream release could change or break the editor	Pinned to `3.8.4` in `editor-loader.js`	Fixed in working copy (28 Sep 2026); confirm once committed
9	Low	Budget → value map duplicated in `host-content.ts` and `functions/api/event-inquiry.ts`.	Label edits silently zero the opportunity value	Import one shared map, or document it (done)	Open
10	Low	Default OG image is an SVG placeholder.	Poor or missing link previews on social media	Add a 1200×630 JPG and update `layout.tsx`	Open: pre-launch
11	Low	Category rename doesn't cascade to events (relation stores the name).	Events drop out of filters	Documented rename procedure	Mitigated by docs

#	Severity	Issue	Impact	Suggested fix	Status
12	Low	No CI; builds are only verified by Cloudflare Pages.	Broken builds are found after pushing	Add a GitHub Actions workflow running lint, format check, and build on PRs	Open
13	Low	No security headers (`_headers`).	Missing CSP/HSTS hardening	Add `public/_headers` (see allow-list in *Build and Deployment*)	Open
14	Info	Unused code: `hostTestimonials` (placeholder quotes), `donationPresets` / `donationImpact()` .	None visible; confusion	Remove, or wire in real testimonials	Open
15	Info	`README.md` is partly outdated (describes four CMS areas; omits sponsors and event categories).	Developer confusion	Point README at this book, or update it	Open
16	Info	Explore the Fort videos have no captions or transcripts configured.	Accessibility (WCAG 1.2)	Add `captionsPath` VTT files in R2	Open

Content still marked as placeholder

Found with `grep -rn PLACEHOLDER src content public/admin functions`:

- Production domain (`siteConfig.url`)
- Public phone and email
- Official social media URLs
- Membership pricing and benefits confirmation
- What's included with event rentals
- Decap OAuth proxy: confirm `decap-oauth.fortadams.org` is deployed and working
- Real OG image

Other items to confirm with the Trust: the official logo asset (currently a wordmark), final FAQ wording, history chapter images (several use placeholder art), and staff photos (all currently placeholders).
